Leading Through Excellence

...Discovering the Possibilities

A SHORT WORKSHOP ON THE
FUTURE YOU DESIRE

Objective:

Ensure leadership consistency and commitment are presented to the workforce from each member of the management group. Eliminate infighting, counter-productive communication patterns and passive aggressive behaviors arising from misaligned agendas and positioning. Transform the bosses from a group to a team with role clarity and common purpose. Avoid cross-communications, confusion and negative impacts on employee engagement that often accompany significant changes in the management group.

Why did Tom Crosby drive his team to win the Baldrige Quality Award for hot dogs? What is it about David Neeleman that created JetBlue Airlines? Each of these people created an exciting destiny because they lived into their convictions. "I am what I *allow*, *promote* and *create*." Join together as the management team to explore evolving your future by choice not chance. Our destiny is influenced by personal vision, preparation, values, will and timing.

At the end of the workshop, participants will :

- Take greater control and accountability for their future.
- Shift from a group to a team through role clarity and goal alignment
- Level the playing field of perspectives
- Unify as the Management team with consistent performance expectations
- Share standards of excellence to guide daily direction
- Agree on what is being creating in the business
- Resolve a group irritant
- Choose a leadership platform
- Create new solutions to increasingly tough problems through broadening world views
